Health Hazards or Risks From Exposure

This material is a substituted iminourea. Dust or fume can cause eye irritation consisting of redness, swelling, and pain. May cause conjunctivitis with repeated exposures. Harmful if inhaled or swallowed. Inhalation of high concentrations may cause respiratory and nasal irritation, coughing, and difficulty breathing. Ingestion may cause nausea, vomiting, constipation, cramps, and or stomach pain.

4. FIRST AID MEASURES

<u>Eye Contact:</u>	Immediately flush out fume or particles with large amounts of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. If eye irritation develops, call a physician at once.
<u>Skin Contact:</u>	Wash skin with plenty of soap and water for at least 15 minutes. Remove contaminated clothing and shoes and launder before reuse. If skin irritation or rash develops and persists or recurs, get medical attention..
<u>Inhalation:</u>	If symptoms of lung irritation occur (coughing, wheezing or breathing difficulty), remove from exposure area to fresh air immediately. If breathing is difficult, give oxygen. If breathing has stopped, perform artificial respiration. Keep affected person warm and at rest. Get medical attention.
<u>Ingestion:</u>	If ingested, immediately call a physician. Induce vomiting if possible, as directed by medical personnel. Never give anything by mouth to an unconscious person.

Medical Conditions Aggravated By Exposure:

Exposure may aggravate an existing asthma, emphysema, or other respiratory disease.

Recommendations To Physicians:

There is no specific antidote for this chemical. Remove from exposure and treat symptoms.

5. FIRE FIGHTING MEASURES

PROPERTY	VALUE	PROPERTY	VALUE
Explosive	Yes	Flammable	Not applicable
Combustible	Not applicable	Pyrophoric	No
Flash Point (°C):	Explodes at 130 (266°F)	Burning Rate of Material:	Not applicable
Lower Explosive Limit:	Not applicable	Autoignition Temperature (°C) :	Explodes at 130 (266°F)
Upper Explosive Limit:	Not applicable	Flammability Classification: (defined by 29 CFR 1910.1200)	Explosive

Unusual Fire and Explosion Hazards:

Do not subject to mechanical shock. Material involved in a fire may not be totally destroyed and will still be subject to detonation. Dust may cause an ignitable and/or an explosive atmosphere.

Extinguishing Media:

Water spray. Apply by mechanical means only.

Special Firefighting Procedures:

Fire involved cargo may explode. Fight all fires from an explosion resistant location. Evacuate all non-essential personnel.

Use water to cool containers exposed to fire. Do not move material exposed to or involved in a fire. Use extreme caution working around this material and avoid any form of mechanical shock. Keep material wet if possible. "DO NOT ALLOW TO DRY."

Firefighters must wear self-contained breathing apparatus (SCBA) and full protective equipment. Structural firefighters' protective clothing will only provide limited protection.

6. ACCIDENTAL RELEASE MEASURES

FOR ALL TRANSPORTATION ACCIDENTS, CALL CHEMTREC AT 800-424-9300.

Spill Response:

A SPILL OF THIS PRODUCT WILL REPRESENT AN EXPLOSION HAZARD. Remove all sources of ignition, heat and static discharge. Stop source of spill as soon as possible and notify appropriate personnel. Clean-up of this material will require extreme caution. Use non-

sparkling equipment and keep material wet at all times. Avoid mechanical shock. Material will decompose in boiling water to form hazardous products listed in Section 10. This material may be neutralized for disposal; you are requested to call 1-888-2891-911 for technical assistance before beginning any such operation.

Accidental Release Procedures:

If a large spill occurs create a dike and flood with large amounts of water. Prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas. See Section 13 for waste disposal.

7. HANDLING AND STORAGE

Precautions for Safe Handling:

DO NOT SUBJECT TO MECHANICAL SHOCK. Avoid dispersion of dust in air. Dust should be removed by washing or HEPA vacuuming. Use appropriate personal protective equipment (see Section 8). Workers should wash hands thoroughly after handling. Eating, drinking and smoking should be prohibited in areas where this material is handled and stored.

Conditions for Safe Storage:

Store in accordance with local regulations. Store in a cool, dry, well-ventilated place away from all sources of ignition. Do not store above 60°C (140°F). Do not expose to light. Product has a 2 year storage life. Store away from Acids, Class B & C explosives, strong oxidizers, and caustics. Avoid mechanical impact or shock and electrical discharge.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters:

CAS #	CHEMICAL NAME	ACGIH TLV	OSHA PEL	INTERNATIONAL OELS
109-27-3	Tetracene	None established	None established	None established

Engineering Controls:

Local explosion-proof exhaust ventilation is recommended if significant dusting occurs or fumes are generated. Otherwise, use general explosion-proof exhaust ventilation.

Respiratory Protection:

Maintain airborne contaminant concentrations below guidelines listed above. Use a NIOSH-approved air-purifying respirator equipped with HEPA cartridges/canisters where there is the potential for exceeding established occupational exposure limits.

Eye/Face Protection:

Use safety glasses.

Hand Protection:

Gloves recommended

Skin Protection:

Wear impervious gloves and other protective clothing (aprons, coveralls) as appropriate to prevent skin contact when using this product.

Hearing Protection:

Not normally needed.
